KAZAKH-BRITISH TECHNICAL UNIVERSITY

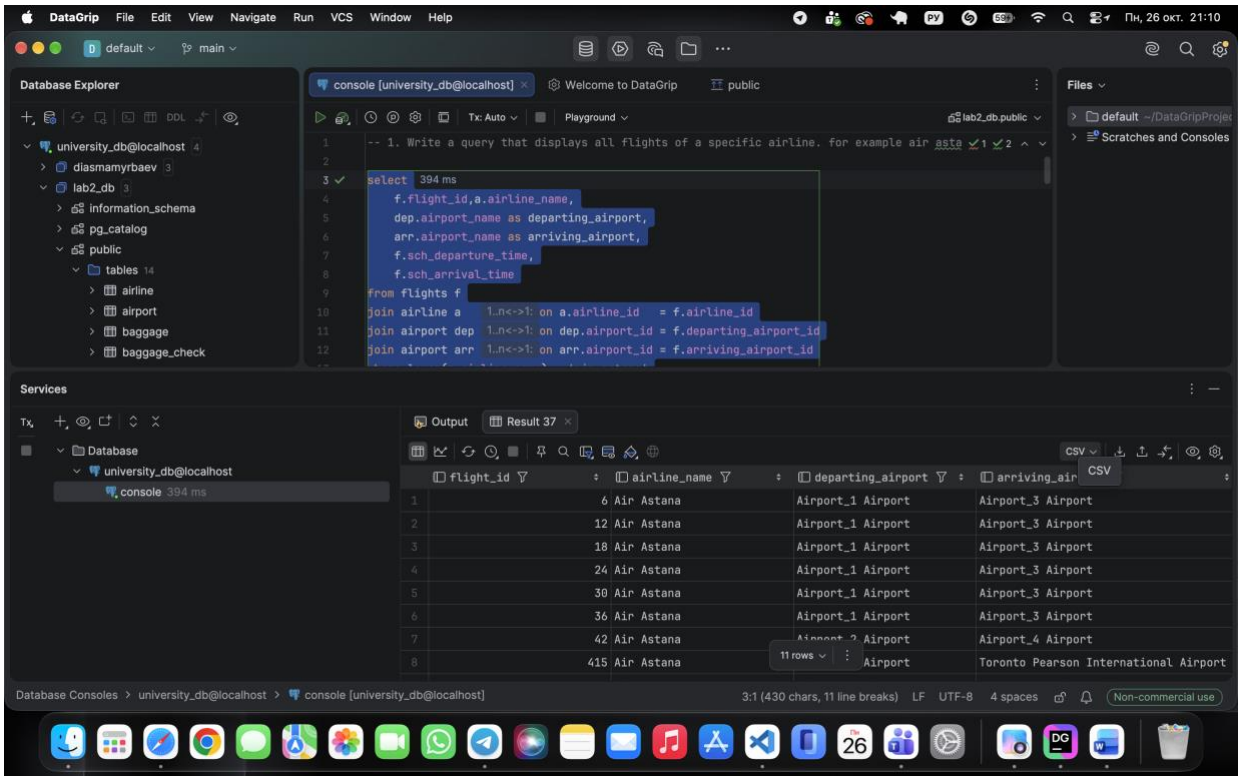

Course name: Databases

Laboratory work 6

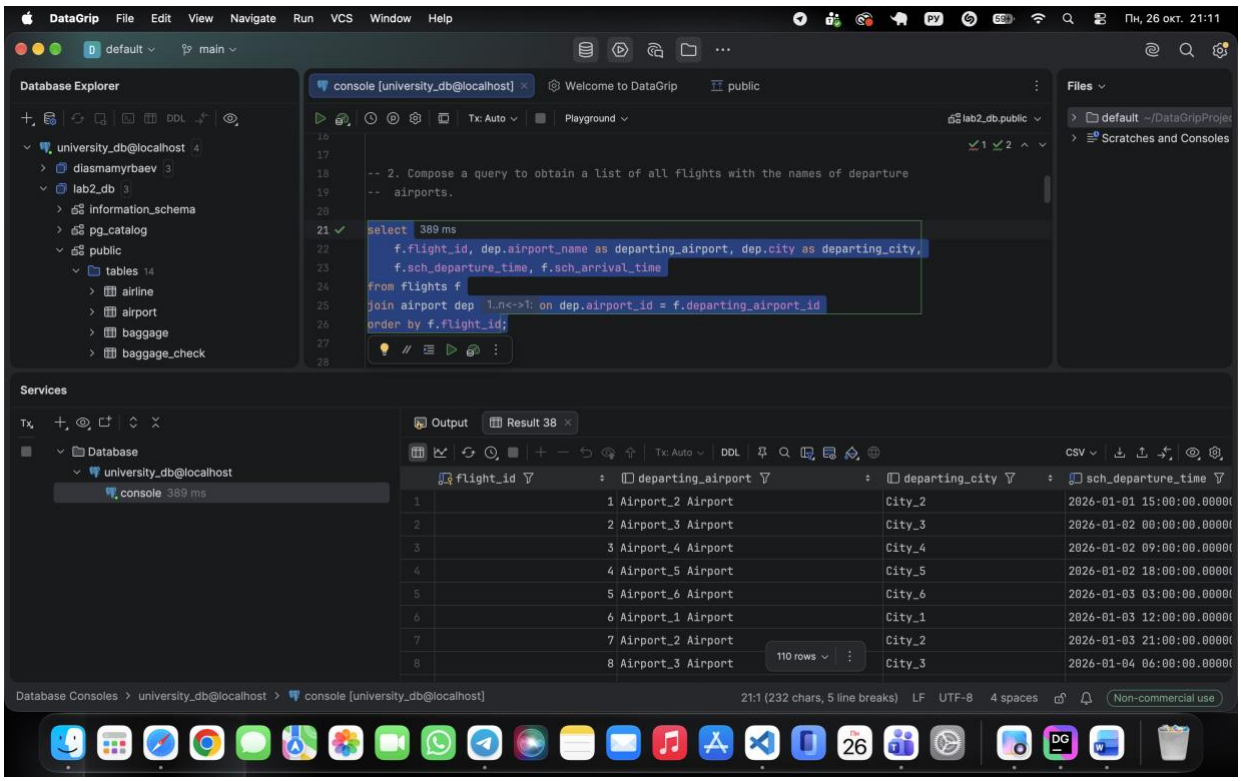

Submission format: please work with the database from the prev lab work and provide full-page screenshots that covers the code and results of each task in the PDF format, also provide sql files.

Required tasks:

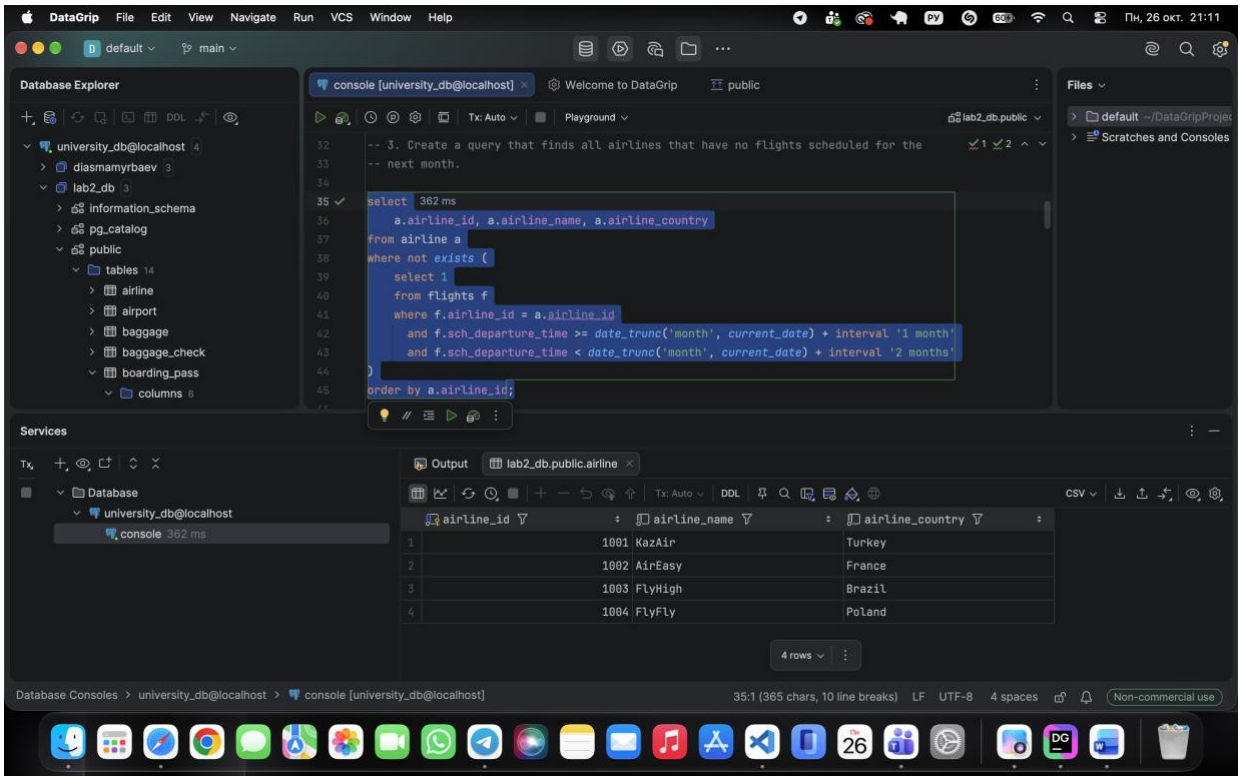

1. Write a query that displays all flights of a specific airline.

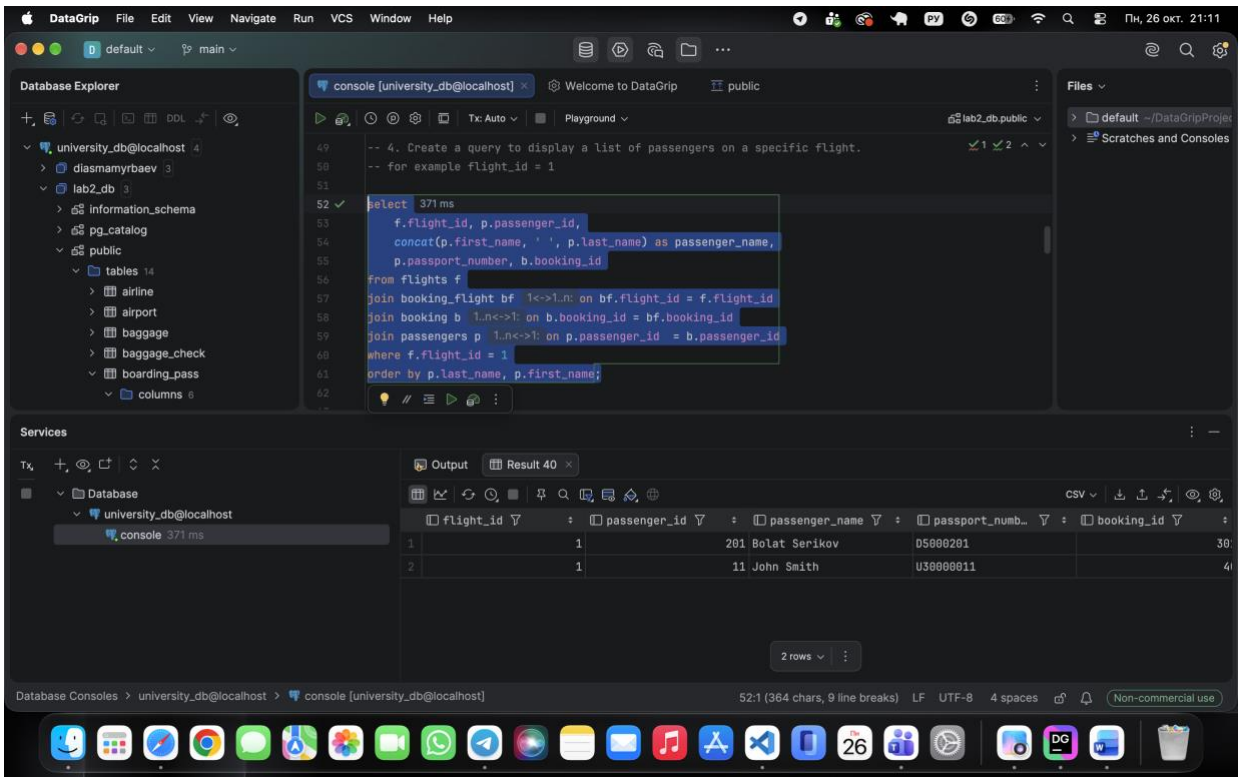

2. Compose a query to obtain a list of all flights with the names of departure airports.

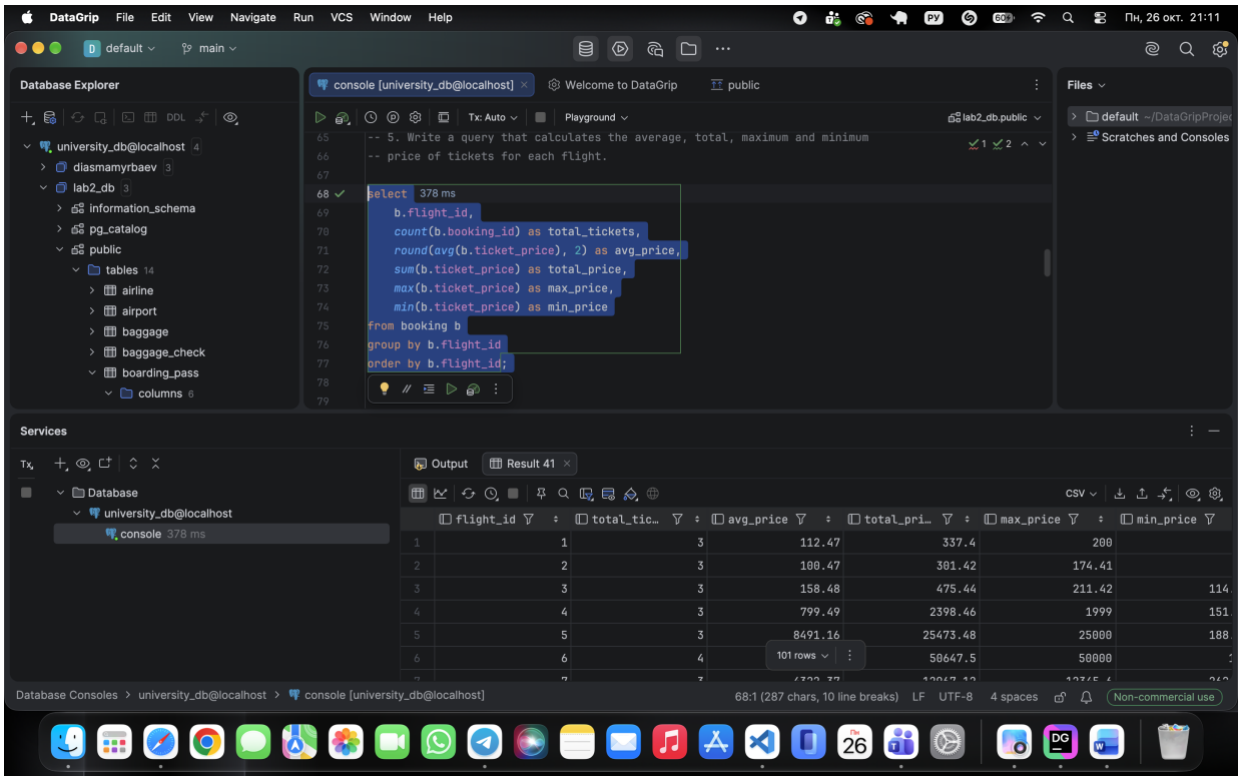

3. Create a query that finds all airlines that have no flights scheduled for the next month.

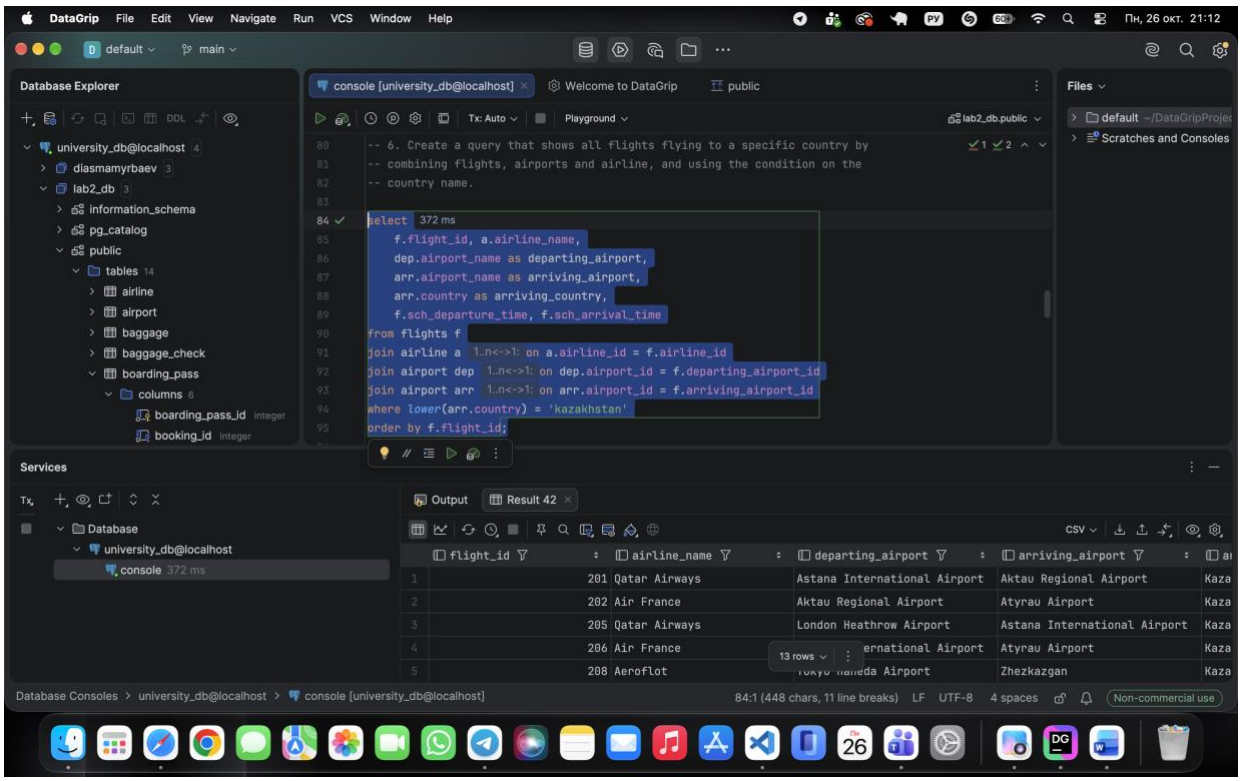

4. Create a query to display a list of passengers on a specific flight.

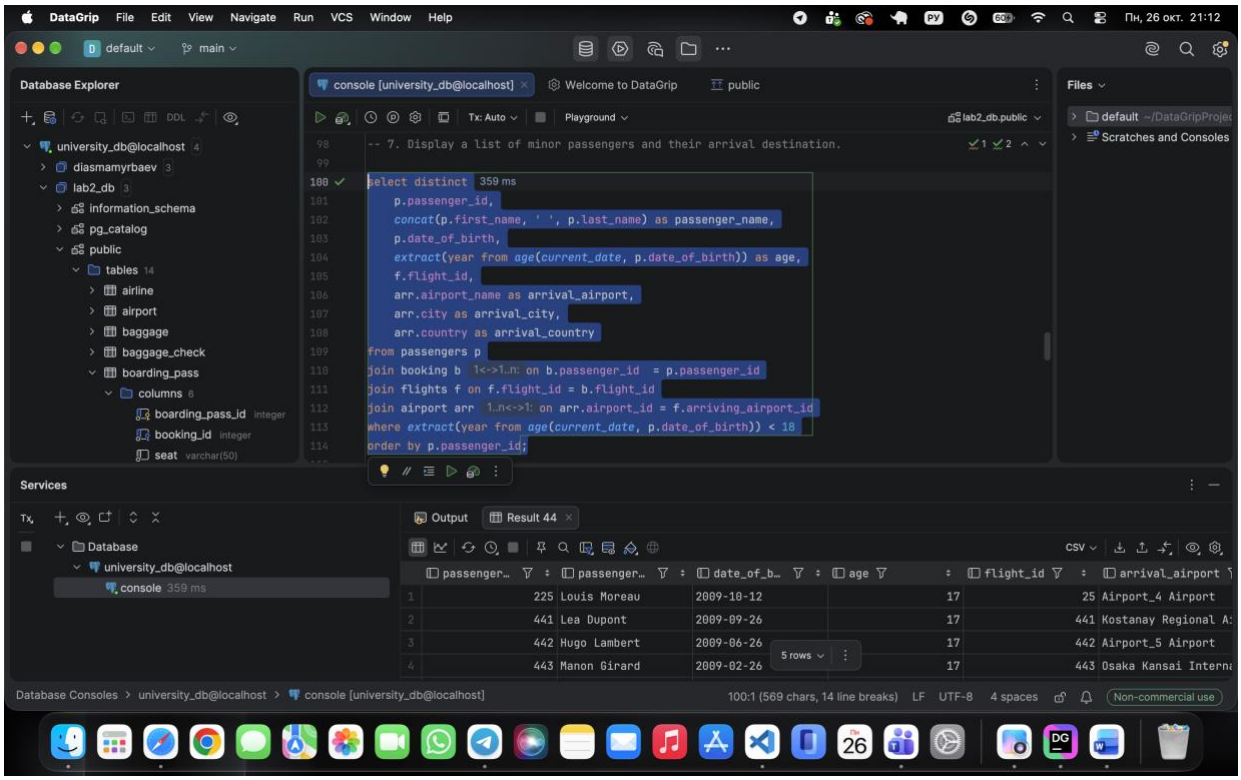

5. Write a query that calculates the average, total, maximum and minimum price of tickets for each flight.

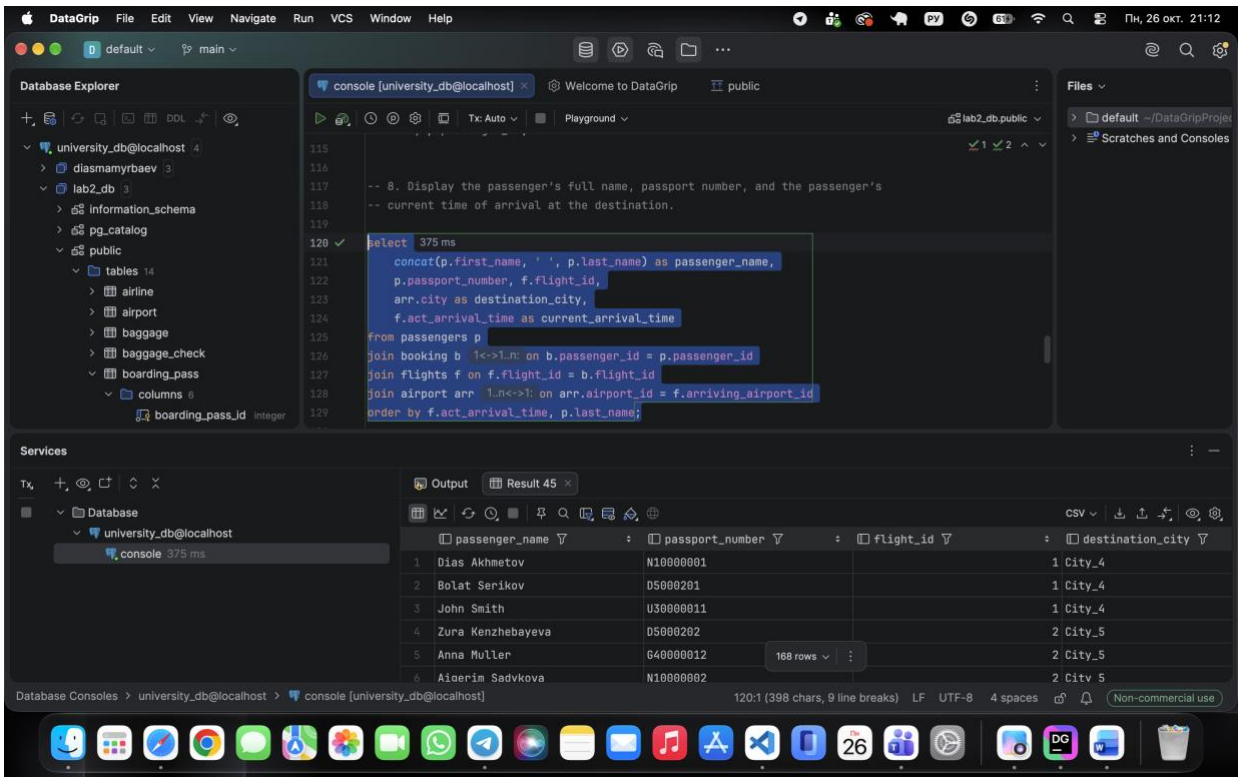

6. Create a query that shows all flights flying to a specific country by combining flights, airports and airline, and using the condition on the country name.

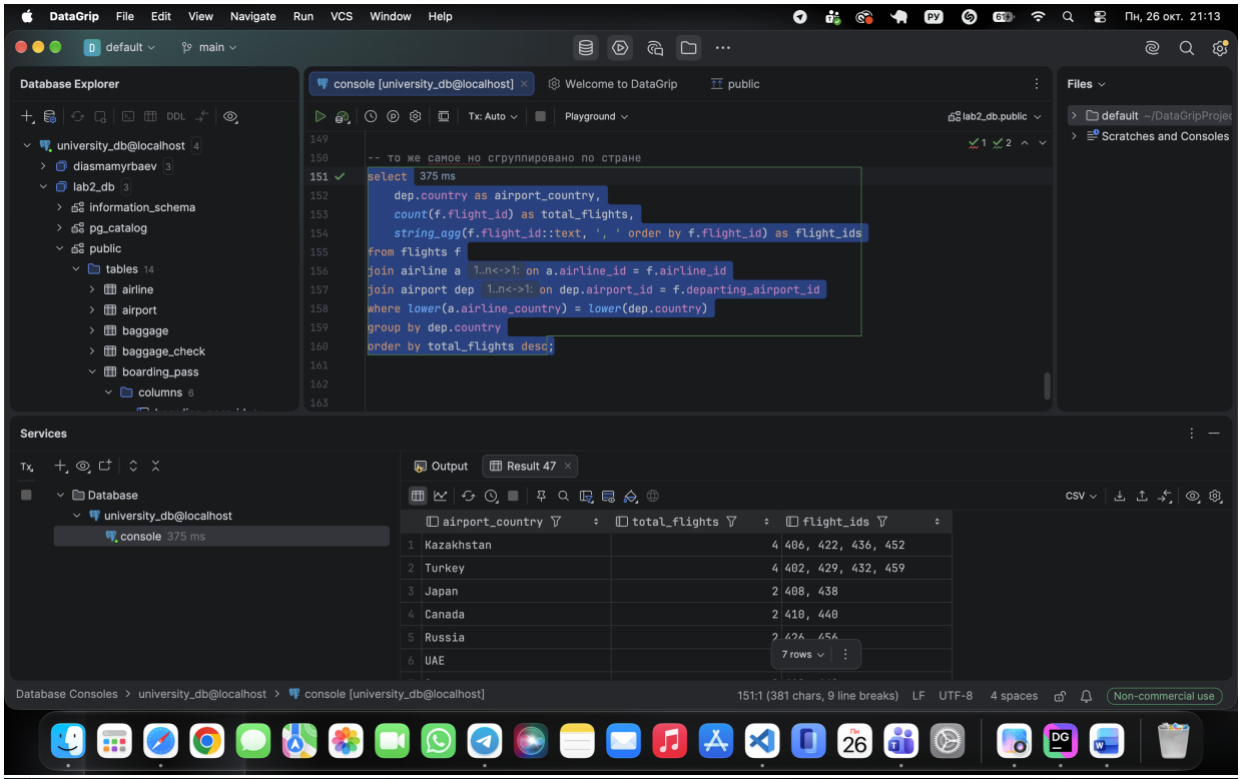

7. Display a list of minor passengers and their arrival destination.

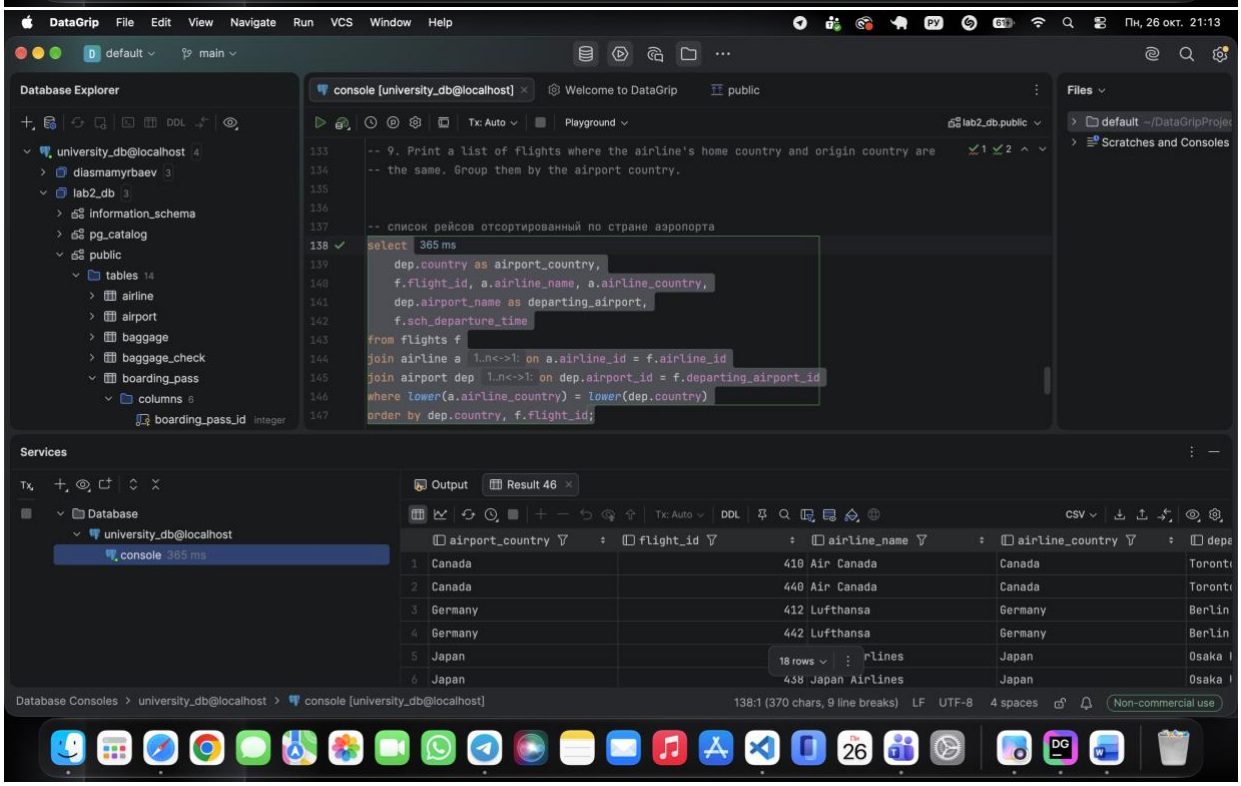

8. Display the passenger's full name, passport number, and the passenger's current time of arrival at the destination.

9. Print a list of flights where the airline's home country and origin country are the same. Group them by the airport country.
