Course name: Databases

Laboratory work 3

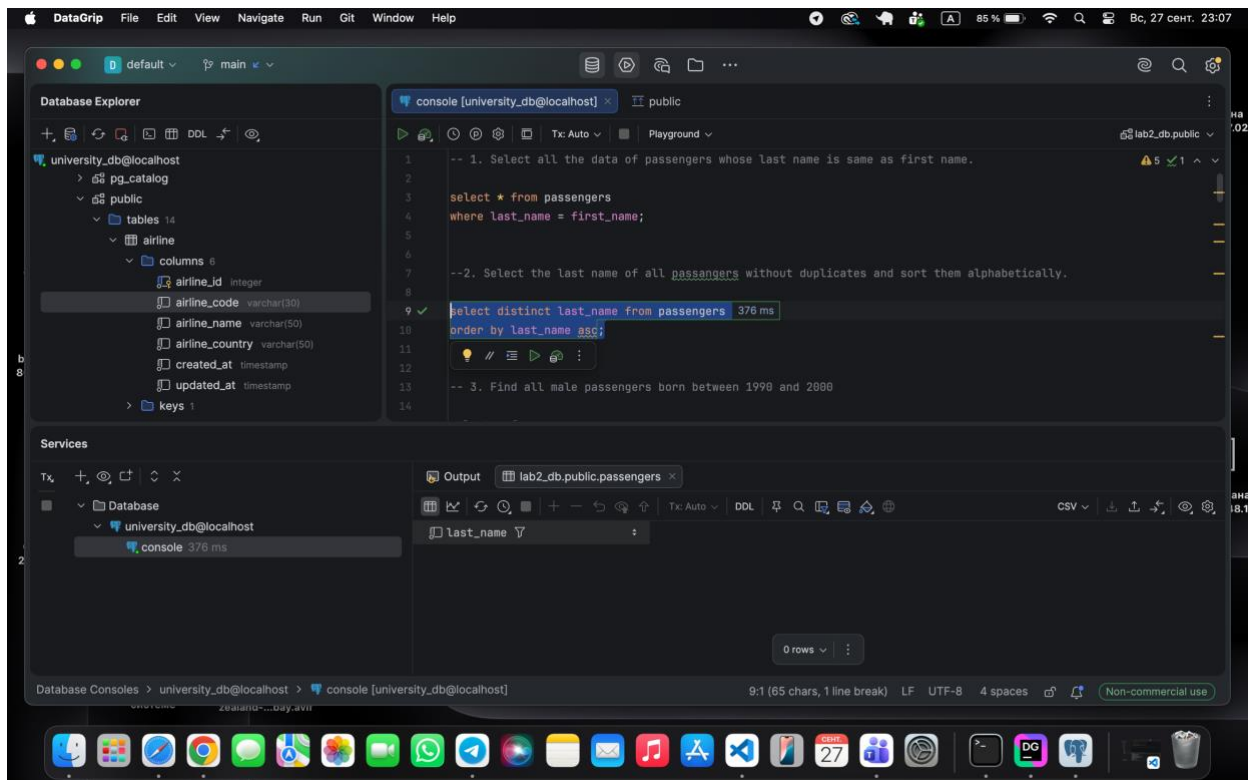

Submission format: please work with the database from the prev lab work and provide full-page screenshots that covers the code and results of each task in the PDF format, also provide sql files.

Required tasks:

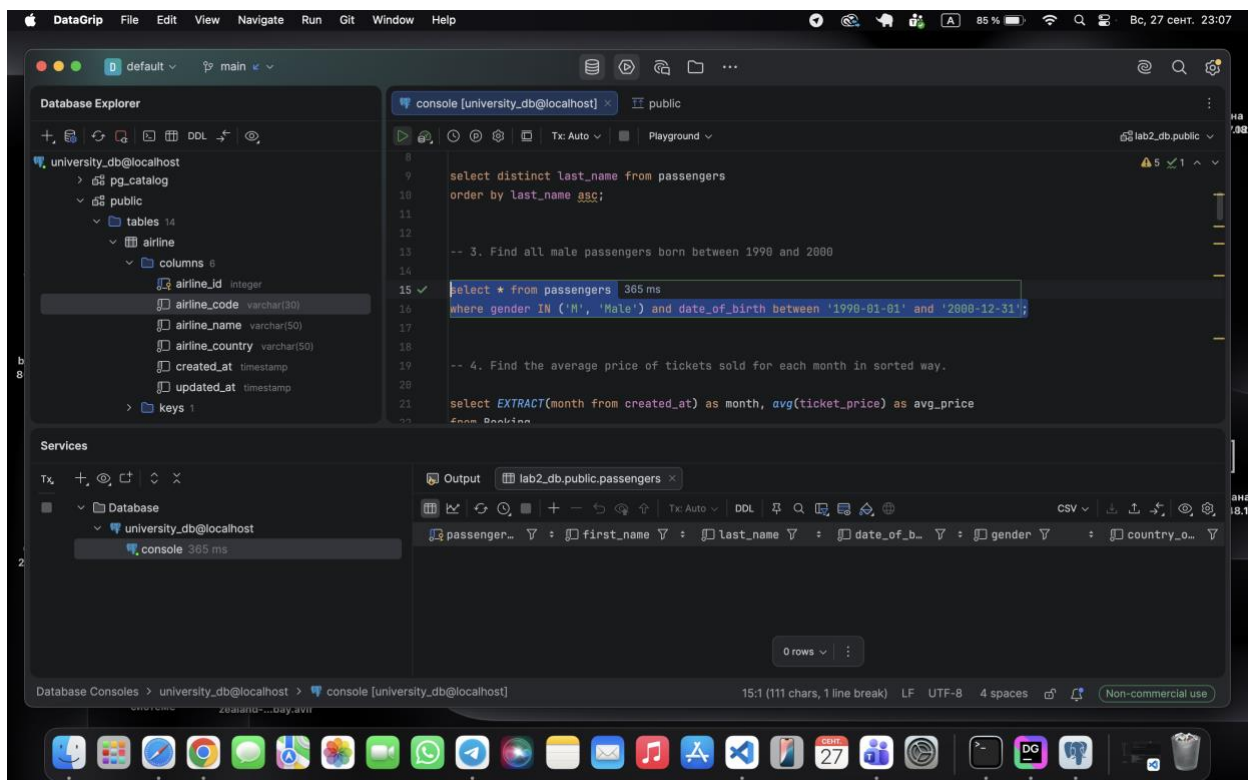

1. Select all the data of passengers whose last name is same as first name.

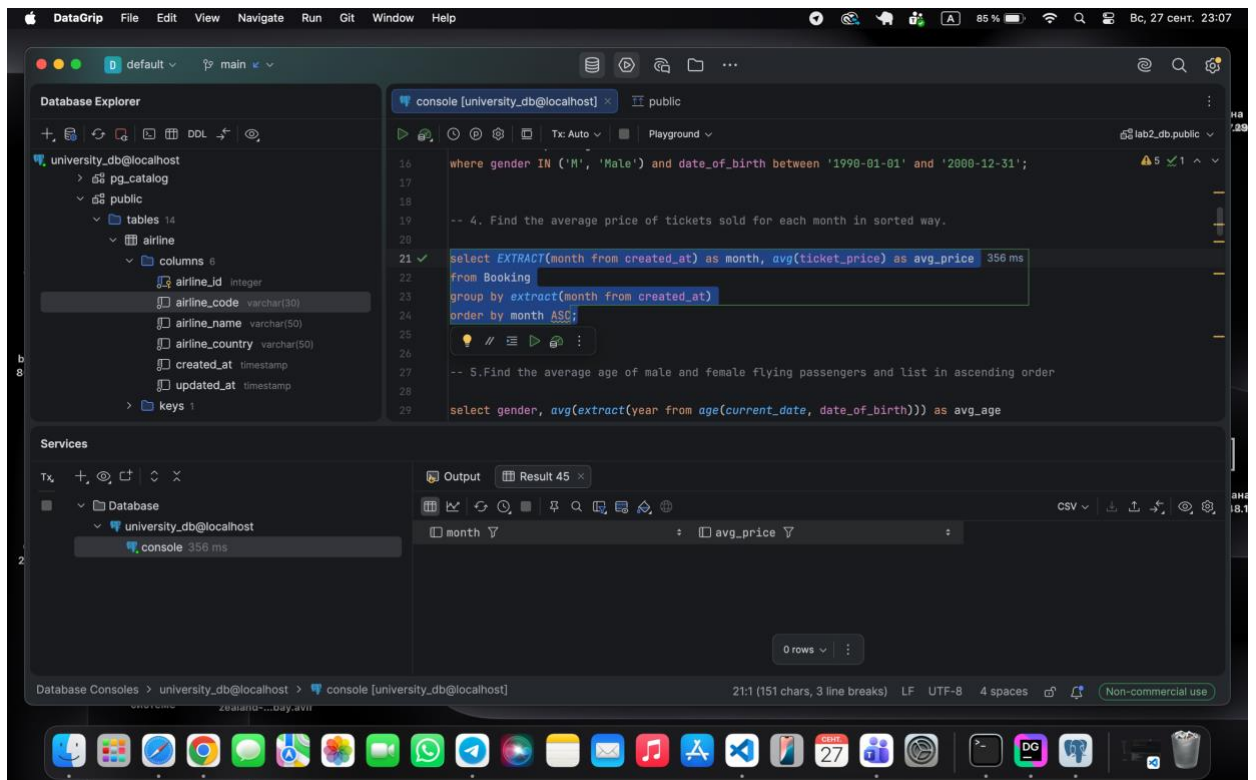

2. Select the last name of all passengers without duplicates and sort them alphabetically.

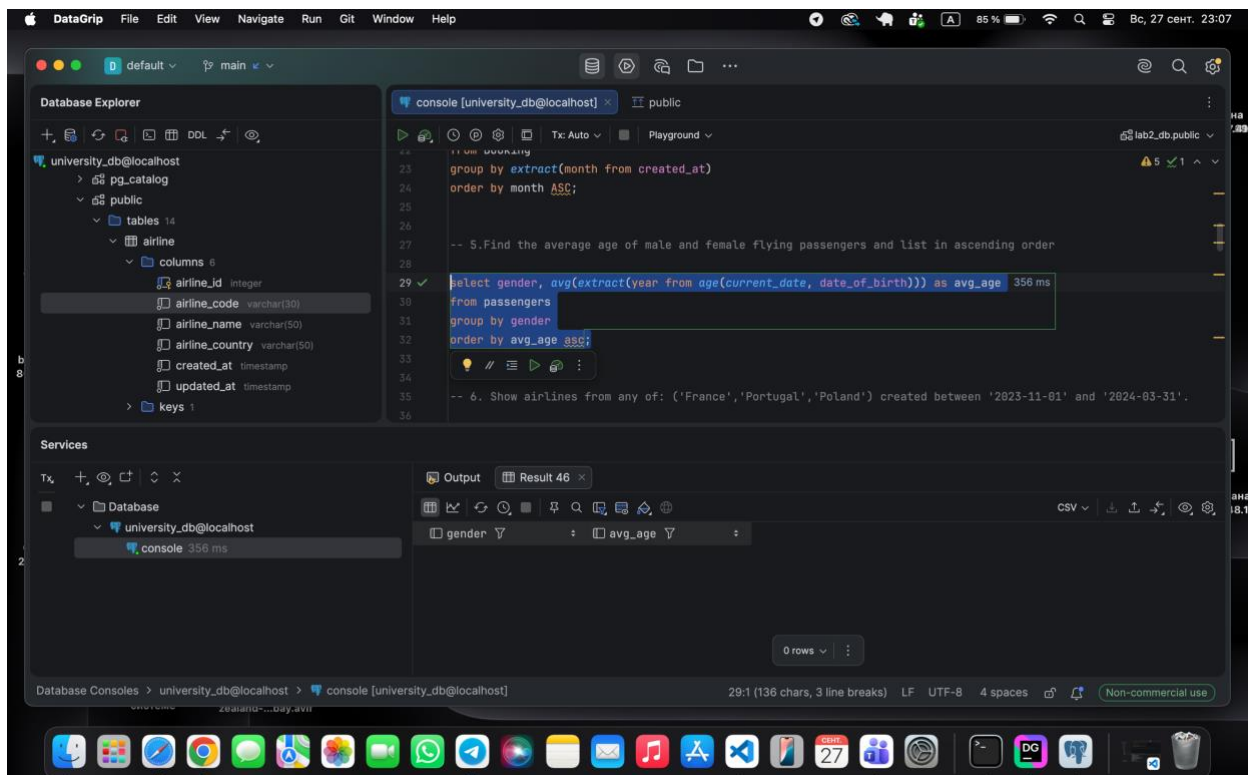

3. Find all male passengers born between 1990 and 2000.

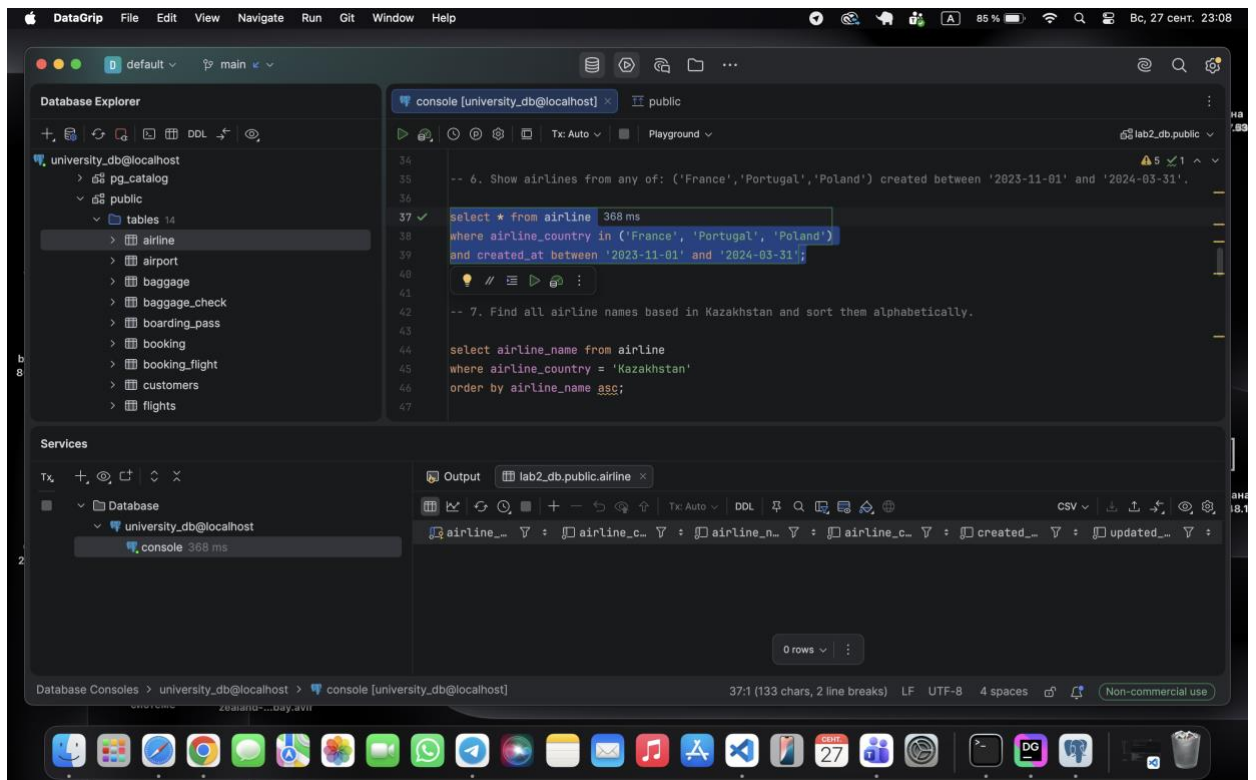

4. Find the average price of tickets sold for each month in sorted way.

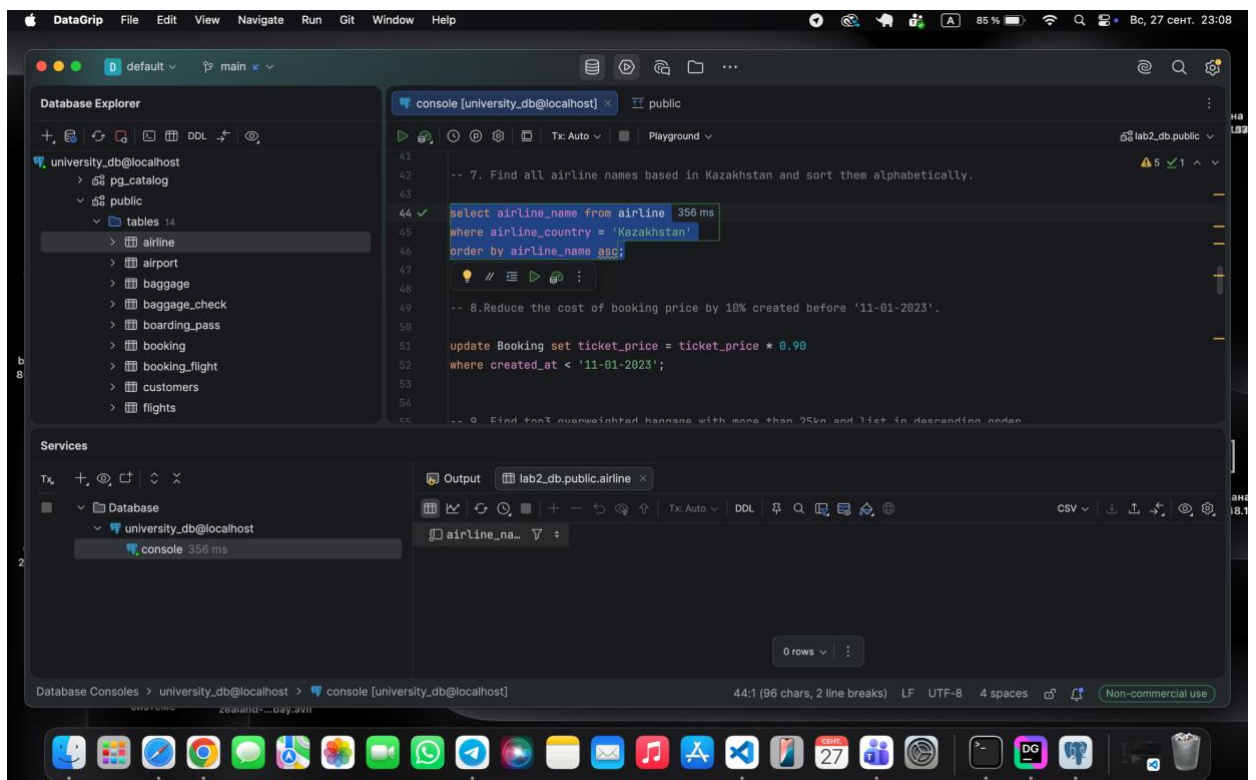

5. Find the average age of male and female flying passengers and list in ascending order

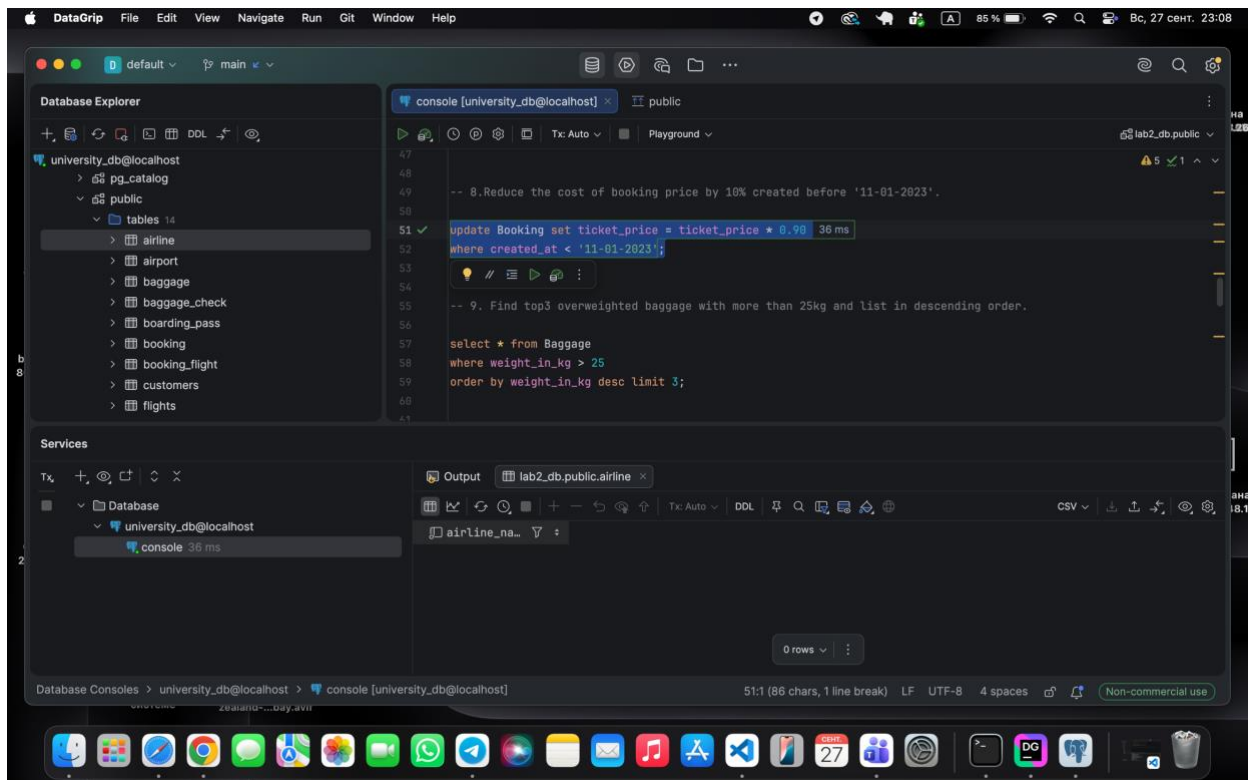

6. Show airlines from any of: ('France','Portugal','Poland') created between '2023-11-01' and '2024-03-31'.

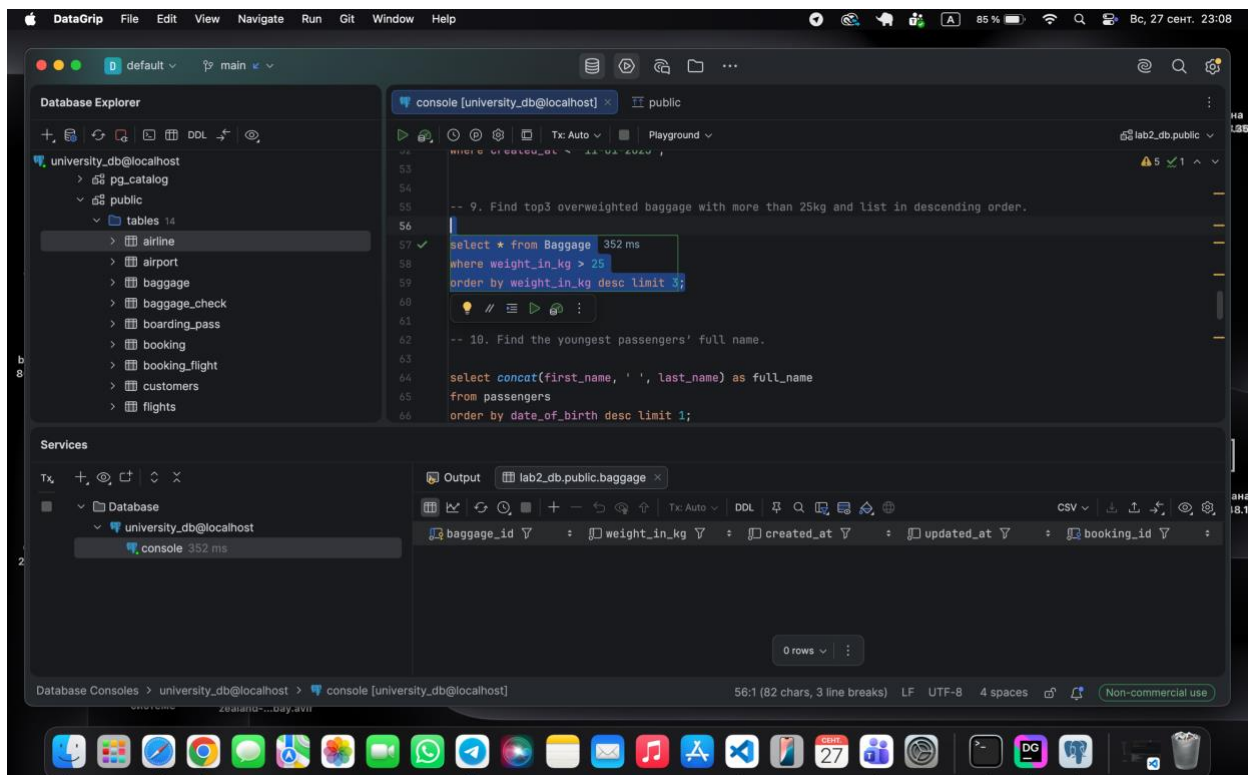

7. Find all airline names based in Kazakhstan and sort them alphabetically.

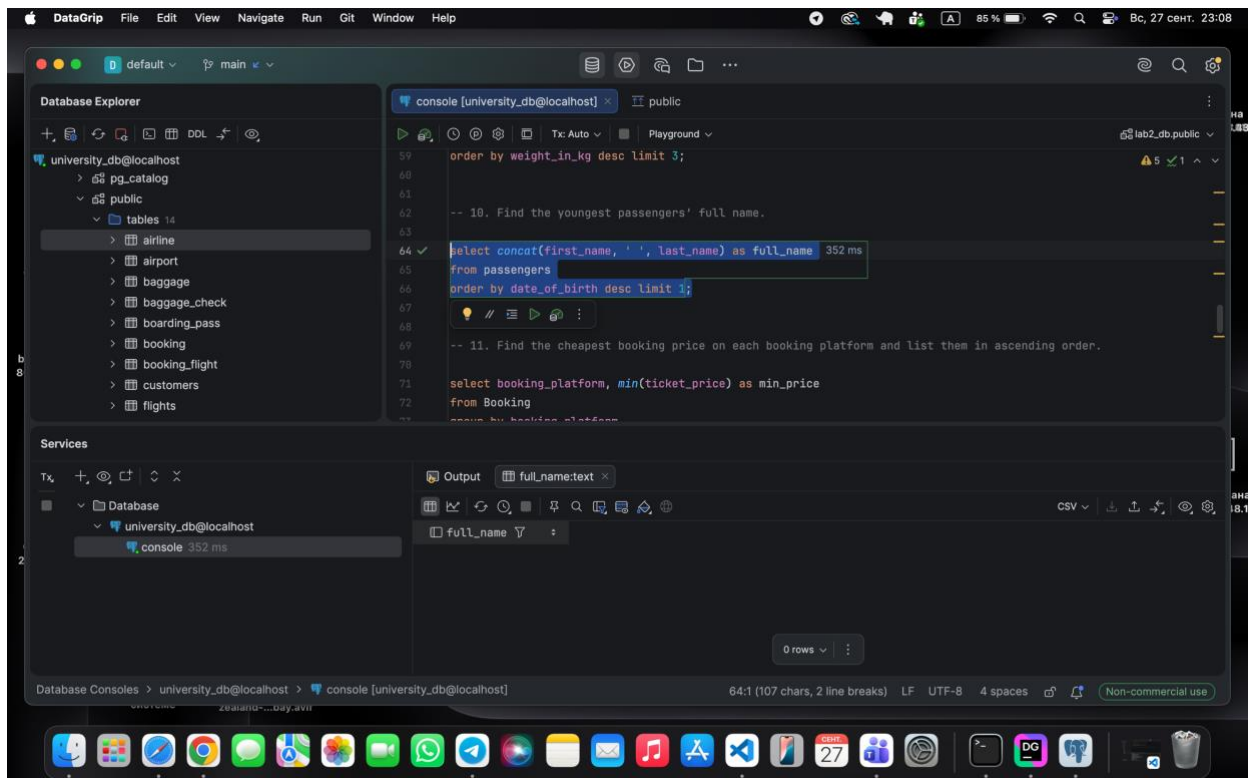

8. Reduce the cost of booking price by 10% created before '11-01-2023'.

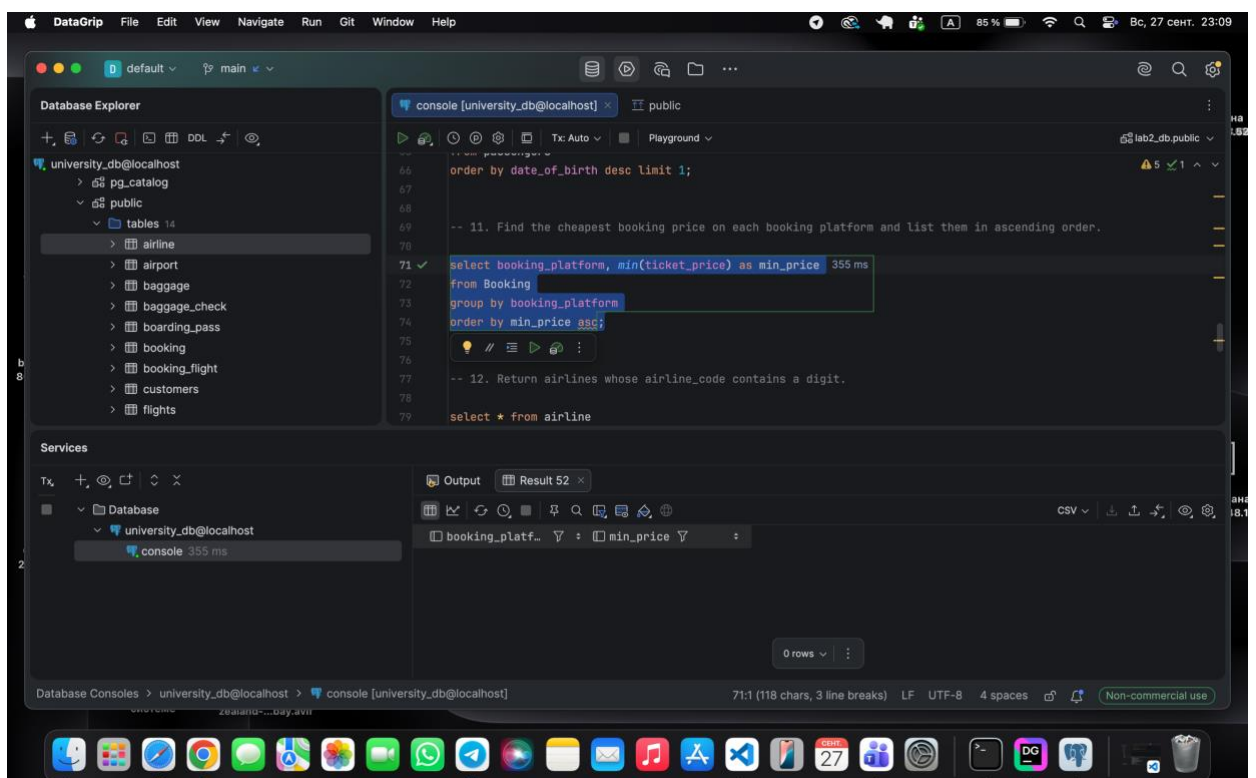

9. Find top3 overweighted baggage with more than 25kg and list in descending order.

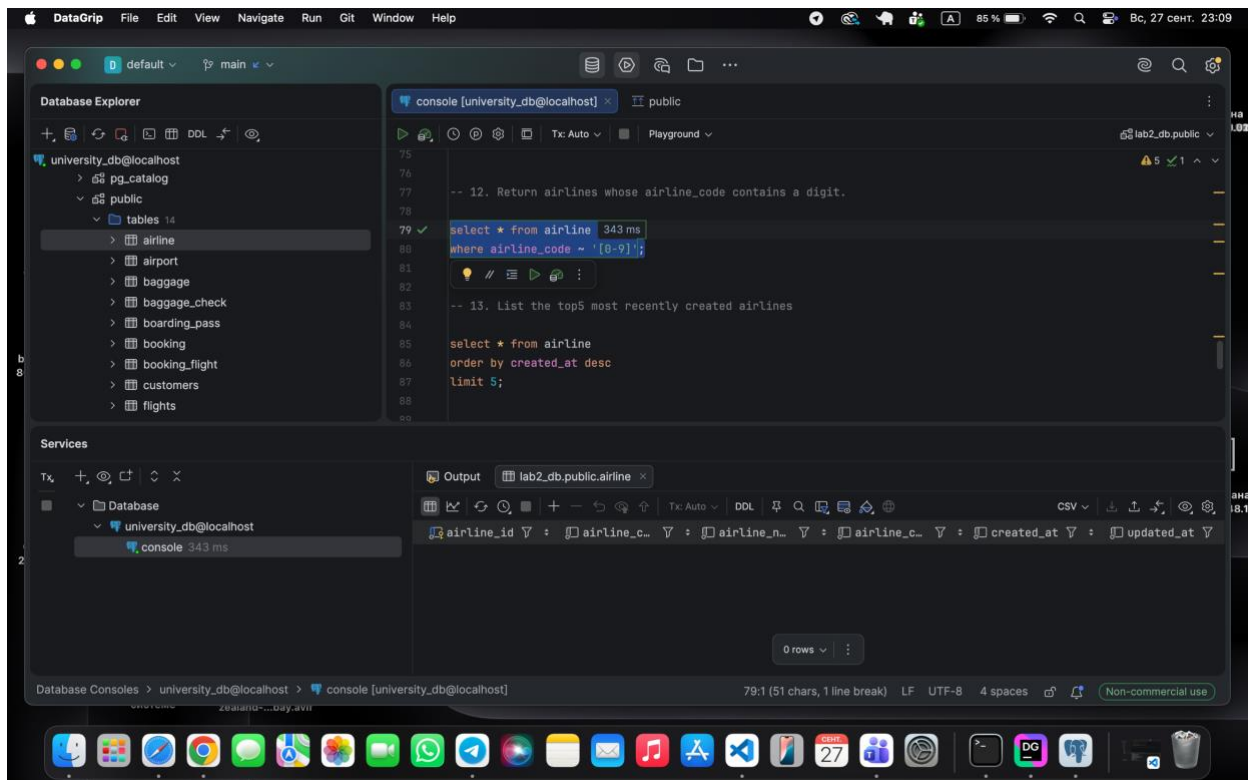

10. Find the youngest passengers' full name.

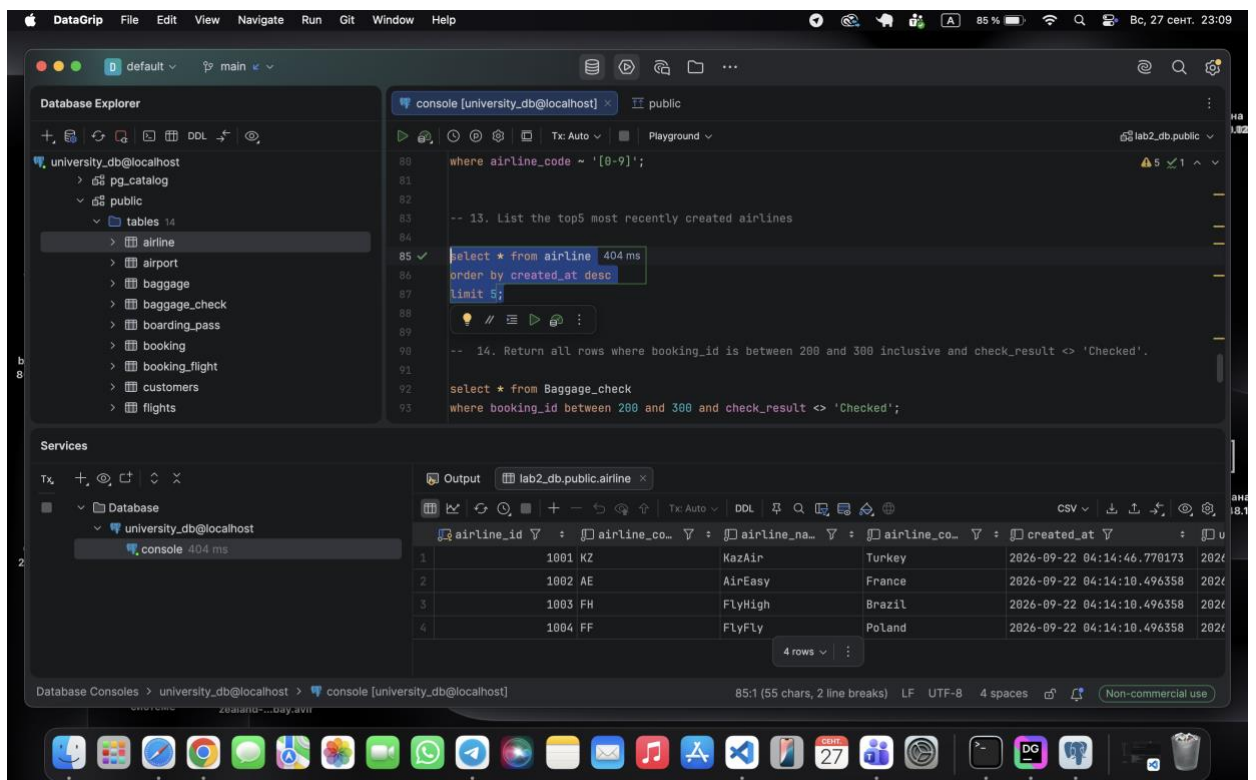

11. Find the cheapest booking price on each booking platform and list them in ascending order.

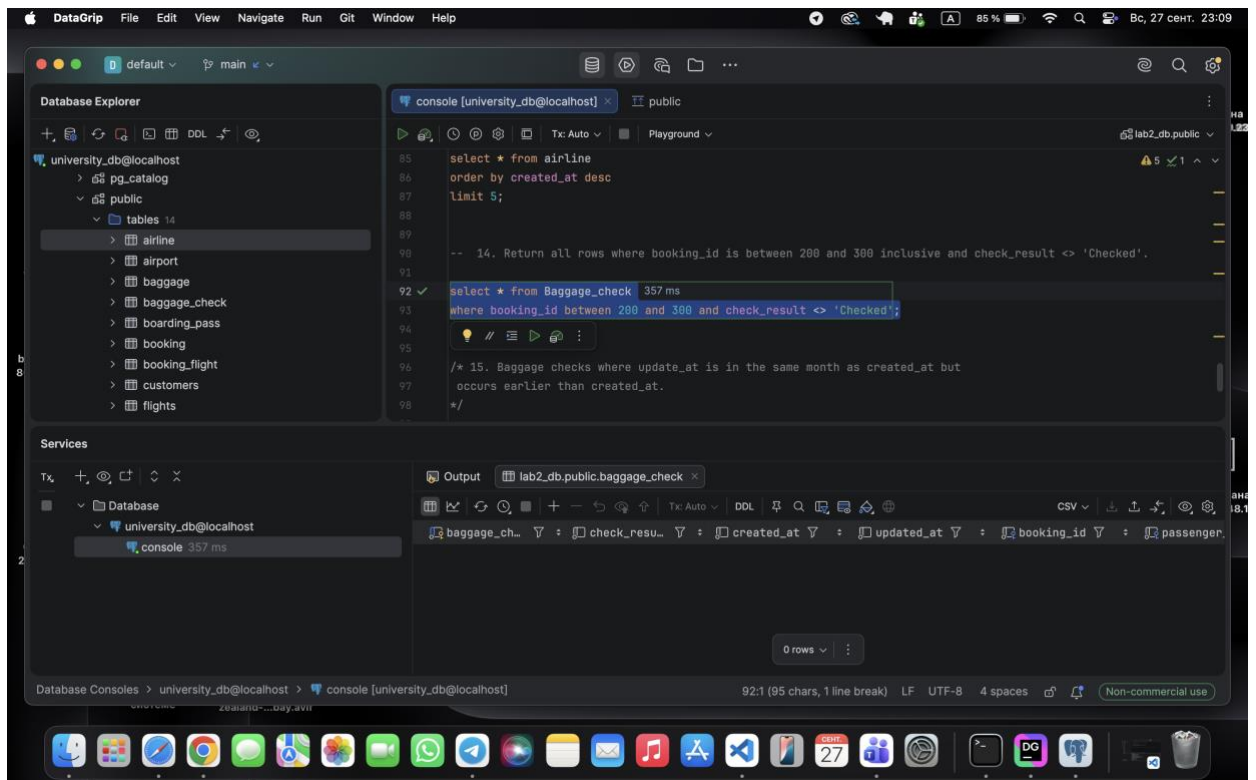

12. Return airlines whose airline_code contains a digit.

13. List the top5 most recently created airlines.

14. Return all rows where booking_id is between 200 and 300 inclusive and check_result <> 'Checked'.

15. Baggage checks where update_at is in the same month as created_at but occurs earlier than created_at.
